We handle the world.

Hydro. Power!

Innovative since 1932.
We handle the world.
Innovative crane solutions that convince worldwide.

Hydro. Power!
Kuenz technology creates innovative solutions for energy and safety.
Enthusiastic employees are our success guarantee since 1932.

In a modern and pleasant working environment our employees can use and improve their skills self-dependent. For Kuenz it is crucial to support our employees as much as possible. That way our motivated employees can contribute to our mutual success.

Kuenz technology creates solutions that inspire worldwide. This enthusiasm is a result of high motivation and attitude.
Numerous successful projects for intermodal terminals have led Kuenz to become market leader in Europe and North America.

Kuenz has a wide experience in crane manufacturing and offers well-designed high quality products for ambitious customers worldwide. Kuenz manages to keep product, engineering and service quality on a high standard. Kuenz develops, designs and manufactures all main components in-house. This guarantees maximum safety and cost effectiveness.
Well-designed and maintenance friendly concepts by Kuenz for fully automated and smooth operation in stacking areas.
Innovative technologies can realize that. Kuenz provides an individual concept for each customer to achieve efficient energy production and safety.

Kuenz is your valuable partner in supplying hydro components due to long term experience.

The world needs energy.

Everything flows.
Safety and efficiency are basic requirements for weir equipment.

Hydro-Mechanical equipment by Kuenz guarantees efficient operation through proven expertise.
Customers from all over the world.

Kuenz Core Competence

Kuenz offers first class products and services to its customers coming from different sectors and industries.

- **All from one source**
  Our strength is to control the entire process from design, production, installation and commissioning, to after-sales support – all from one source – Kuenz.

- **High number of qualified engineers**
  We support our customers worldwide by using the following best-practice standards: innovation and competence, certified quality, utmost reliability and the excellent knowledge of our engineers, who account for more than 25% of the entire workforce.

The foundation of Kuenz business philosophy is a continuous face-to-face dialogue with our customers. Innovation and competence combined with continuous improvement are the basis of our long-term success. We believe that thoroughly understanding the specific requirements and needs of our customers allows us to provide the right products and services.
