

TGI Maritime Software

35 years of experience in the maritime industry

Well established in African continent

Software editor and integrator for maritime terminals

Leader in the French market

A word from the CEO

"Thanks to its ergonomic interface, OSCAR is an intuitive and easy to use TOS. Every day, our customers trust us to simplify and optimize their shore and maritime operations. Guided by innovation and proactivity values, our teams provide modernity and flexibility each day with OSCAR, allowing our clients to better meet today's and tomorrow's challenges.

MARC BOYER CHAMMARD

Why Choose Us?

Fast development and integration of our software

containers, Ro-Ro and conventional terminals

Modular, adaptable and intuitive software

Cloud solution usable anywhere, anytime

Partnerships with technology leaders

OSCAR, far more than a TOS

Whether your project is a software migration or a start from A to Z, **we support you from end to end.** Besides being a software editor, we integrate our solutions directly on your terminal. All services (development, equipment integration, training, support, maintenance, updates) are provided by our teams.

Suitable for Ro-Ro and mixed terminals

Our solution manages **all containers types** (reefer, dangerous, empty, etc.), **all types of ships** (barges, ro-ro, conventional, container carriers...) and **different land approaches** (train, handling equipment, trucks, etc.)

Fast adoption by your teams

Our experienced and certified trainers provide personalized training for your teams. OSCAR deployment is quick and efficient. In just a few weeks, your teams are able to master OSCAR.

WHY CHOOSE OSCAR

Our Terminal Operating System can be used anywhere, from a computer, tablet or mobile phone. You can thus intervene directly on ongoing missions and opt for the most effective decisions.

Widely accessible software

"OSCAR is a complete software which allows a real-time control of all our maritime operations in Cotonou. Its user-friendly interface couldn't be easier to use for our TOS teams."

Benin Terminal | Cotonou

Plan, track and control operations in real time

- of their use
- intelligent algorithms
- ► Call reports
- at scale and in real time map
- **Dashboards** and **decision making tools**

Vessel Operations management in OSCAR

all your shore and maritime

Handling equipments management and optimization

Most profitable and secure yard strategy based on

Goods and equipment tracking on an interactive

Visualize at a glance your terminal's activities

- Dashboard centralizing all your terminal's productivity data
- Widgets added in a few clicks and based on relevant indicators
- Shared dashboard with authorized people

OSCAR FUNCTIONALITIES

OSCAR Dashboard

Online appointment module dedicated to truck drivers

Streamline traffic on your terminal

- to streamline traffic on terminal
- ► TGIBOX complementary solution allowing precision
- containers' weight upon arrival

Online appointment module shared with drivers

Container geo-tracking on the yard with centimetric

Weighing module system included to **certify**

Gate Operating System interfaced with OSCAR

Communicate successfully with all partners

Integrated EDI module allowing exchanges of information with all your partners per standard formats (EDIFACT, AP+, CI5, S-One, etc.) or based on your specifications.
