

Port Technology International

CONTENT CALENDAR 2026

**The Premier Media Company
for the Ports and Terminals Sector**

About us

Powering Port Intelligence Since 1995

Port Technology International (PTI) is the leading global publication dedicated to the Ports and Terminals industry. Recognised as a trusted source of knowledge, PTI delivers high-quality editorial content, technical papers, and expert insights covering all areas of port and terminal operations.

Published digitally throughout the year, the **PTI e-Journal** features exclusive analysis from senior executives and industry specialists on the latest trends, technologies, and challenges shaping the port landscape. Our mission is to connect and empower the global ports community by sharing innovation, promoting collaboration, and supporting the advancement of smart, sustainable, and efficient port operations.

Our Contributors

Journal Content Calendar

JANUARY

Energy Transition

- Global port energy transition and sustainability goals
- Electrification of terminal equipment and vessels
- Integration of renewables and onshore power systems

FEBRUARY

Brownfield Automation

- Upgrading/retrofitting existing cranes, AGVs
- Safety and regulatory challenges for retrofitted automation
- Lessons from LATAM automation pilots

MARCH

Intermodal Synergy

- Enhancing multimodal connectivity in port networks
- Digital tools improving intermodal operations
- European case studies on terminal integration

APRIL

Human-Machine Integration

- Integrating human operators with automation under EU labour frameworks
- Upskilling programmes and digital training
- Collaborative approaches to safety and operational efficiency

MAY

Workforce & Transformation

- Leadership and workforce transformation strategies
- Developing diverse and skilled maritime talent
- Women in Maritime Focus

JUNE

Smart & Sustainable Innovation

- Smart port technologies enabling sustainability
- Green fuel projects and carbon reduction initiatives
- Digital twins for infrastructure lifecycle management and emissions tracking

Journal Content Calendar | Continued...

JULY

Port Safety & Security

- Port safety, resilience, and operational continuity
- Cybersecurity and data protection in terminals
- Compliance and incident prevention best practices

AUGUST

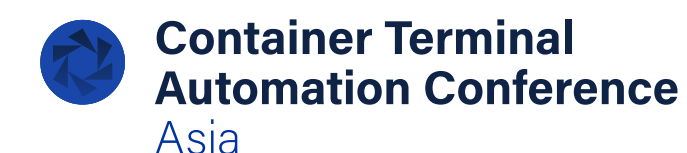

Digital Platforms

- Next-gen PCS and data sharing
- AI, IoT, Digital Twins, blockchain integration in logistics
- Cargo visibility through digital tools

SEPTEMBER

Automation at Scale

- AI and predictive analytics for high-volume terminal optimisation
- Scaling innovation across mature and emerging Asian hubs
- Partnerships with startups and applied R&D

OCTOBER

Intelligent Port Systems

- Agentic AI and autonomous decision systems
- Adaptive learning and dynamic optimisation
- Digital twins enabling real-time simulation

NOVEMBER

Port Interoperability

- Maritime Single Window implementation and compliance
- Port Community Systems integration
- Building digital trade corridors and ecosystem collaboration

DECEMBER

Year-End Port & Logistics Review/2027 Outlook

- Key achievements and technology highlights from 2026
- Sustainability and digitalisation trends shaping 2027
- Expert insights and strategic outlook for ports
